ELSEVIER

Comput. Methods Appl. Mech. Engrg. 126 (1995) 401–402

Computer methods in applied mechanics and engineering

Contents Volume 126

Volume 126, Nos. 1–2, September 1995

Multigrid method for periodic heterogeneous media. Part 1: Convergence studies for one-dimensional case
J. Fish and V. Belsky 1

Multi-grid method for periodic heterogeneous media. Part 2: Multiscale modeling and quality control in multidimensional case
J. Fish and V. Belsky 17

Finite element procedure for solving contact thermoelastoplastic problems at large strains, normal and high pressures
A.V. Idesman and V.I. Levitas 39

Adaptive Dynamic Relaxation algorithm for non-linear hyperelastic structures. Part I. Formulation
D.R. Oakley, N.F. Knight and Jr 67

Adaptive Dynamic Relaxation algorithm for non-linear hyperelastic structures. Part II. Single-processor implementation
D.R. Oakley, N.F. Knight and Jr 91

Adaptive Dynamic Relaxation algorithm for non-linear hyperelastic structures. Part III. Parallel implementation
D.R. Oakley, N.F. Knight, Jr and D.D. Warner 111

Element-free Galerkin method for wave propagation and dynamic fracture
Y.Y. Lu, T. Belytschko and M. Tabbara 131

Automatic time step control algorithms for structural dynamics
G.M. Hulbert and I. Jang 155

Some theoretical aspects in computational elasto-plasticity and their application
D. Zhu 179

Volume 126, Nos. 3–4, October 1995

Hierarchically partitioned solution strategy for CFD applications. Part I—Theory
J. Parris and J. Padovan 197

Hierarchically partitioned solution strategy for CFD applications. Part II—Numerical applications
J. Parris and J. Padovan 223

Implementation of a modal reanalysis method in a finite element analysis context
P. Level, A. Oudshoorn, P. Drazetic and D. Moraux 239

Iterative method for the shape of static drops
S.D. Iliev 251

Least-squares methods for the velocity-pressure-stress formulation of the Stokes equations
P.V. Bochev and M.D. Gunzburger 267

Numerical modelling of damage development and viscoplasticity in metal matrix composites
C.J. Lissenden and C.T. Herakovich 289

A fully conforming spectral collocation scheme for second- and fourth-order problems
A. Karageorghis 305

Parallel computing for the high precision direct integration method
W. Shen, J. Lin and F.W. Williams 315

An algorithm for plastic limit analysis
Y.-G. Zhang and M.-W. Lu 333

An *L*-stable Rosenbrock method for step-by-step time integration in structural dynamics
R. Piché 343

Three-dimensional solutions for coupled thermoelectroelastic response of multilayered plates
K. Xu, A.K. Noor and Y.Y. Tang 355

Integration of polynomials over linear polyhedra in Euclidean three-dimensional space
H.T. Rathod and H.S. Govinda Rao 373
